

2A CLASS NEWSLETTER

JULY
2024

What we will be learning

ENGLISH

Students will read, view and listen to stories about a familiar character, and by the end of term, write a story of their own that includes this story character.

MATHEMATICS

Students will read and record times on analogue and digital clocks. They will represent multiplication as groups and arrays, and division by grouping equal-sized groups. They will solve simple problems using representations of division. Students will also measure, compare and order several objects using uniform informal units, according to length, mass, volume and area.

SCIENCE

Students will design a toy that will move with a push or pull, and describe a change to the toy and how it affects the toy's movement. They will make a prediction about the toy's movement and represent and communicate their observations and ideas.

HASS

This term students will conduct an inquiry to answer the question: How and why have changes in road transport affected the lives of people over time.

HEALTH

Students explore safe and unsafe situations so that they understand their responsibility in staying safe. They examine the safety clues and identify the emotions they feel in response to safe and unsafe situations. Students consider different aspects of sun safety and how they can promote their health, safety and wellbeing.

Welcome back! I hope you all enjoyed your break from the school routine. We have had a great start to the term with students settling back into learning routines, and excited about all our new topics. It's such a busy, yet exciting time packed with activities for all to enjoy!
